on a clear starry night the jewelled beauty and unimaginable immensity of our universe is awe inspiring star gazing with binoculars is rewarding and may begin a lifelong hobby patrick moore has painstakingly researched exploring the night sky with binoculars to

describe how to use binoculars for astronomical observation he explains basic astronomy and the selection of binoculars then discusses the stars clusters nebulae and galaxies that await the observer the sky seen from both the northern and southern hemispheres is charted season by season with detailed maps of all the constellations the reader can also observe the sun moon planets comets and meteors with many beautiful illustrations this handbook will be helpful and encouraging to casual observers and those cultivating a more serious interest the enjoyment of amateur astronomy is now available to everybody

viewing the constellations with binoculars is a complete guide to practical astronomy written for beginners intermediate level astronomers and even people who have not yet turned their gaze to the night sky the required observing equipment to get the full value from this book is no more than a pair of regular 10 x 50 binoculars but even more can be seen with a small astronomical telescope this comprehensive introduction to astronomy and practical observing is far more than a guide to what can be seen in the night sky through binoculars it introduces the reader to some basic and some not so basic astronomical concepts and discusses the stars and their evolution the planets nebulae and distant galaxies there is a guide to selecting and using binoculars for astronomy as well as a getting ready to observe section containing invaluable practical hints and tips the second part of the book is an extraordinarily complete atlas and guide to the night sky down to 30o n covering all the usa and europe it is illustrated with superb and sometimes beautiful amateur astronomical photographs detailed maps down to 5th magnitude descriptions and data on all astronomical objects of interest

often called the pulp era the years between the two world wars have seen a tremendous surge in interest among wargamers a world aflame captures the adventurous nature of the time period to present a fun fast paced set of tabletop miniatures rules that can handle the many diverse conflicts of the period from the chinese civil wars and the great game in central asia to the irish war of independence and the bitter ideological warfare of the russian and spanish civil wars the rules also contain options for the very british civil war this gaming trend has sprung up in recent years following a what if scenario that has edward viii refusing to abdicate the throne thrusting the country into civil war in 1938 it is a quirky

fun setting and one that is surprisingly popular written by a life long wargamer a world aflame focuses on the daring and heroism of battles fought in the last great era of adventure

how can humans keep thousands of words in mind and have no difficulty understanding trillions of sentences the answer to this question might lie in parents teaching their children language skills or in in the human brain which may be equipped with a language instinct or maybe in impressive memory skills that link words to their perceptual information undoubtedly there is some truth to some of these explanations but one answer perhaps the most important answer has been largely ignored keeping those words in mind tries to remedy this oversight linguist and cognitive psychologist max louwerse phd argues that understanding language is not just possible because of memory brains environment and computation but because of the patterns in the sequence of sounds and words themselves he demonstrates that what seems to be an arbitrary communication system with arbitrary characters and sounds that become words and arbitrary meanings for those words actually is a well organized system that has evolved over tens of thousands of years to make communication as efficient as it is what is needed for humans to acquire language is for humans to recognize and discover the patterns in our communication system by examining how our brains process language and find patterns the intricacies of the language system itself and even scientific breakthroughs in computer science and artificial intelligence keeping those words in mind brings a brand new and interdisciplinary explanation for our ability to extract meaning from language

explore the universe from your own backyard embark on an awe inspiring journey through the cosmos with just a pair of binoculars 50 things to see with binoculars in space is your ultimate guide to exploring stars galaxies and nebulae right from your backyard whether you're a beginner or a seasoned stargazer this book makes navigating the night sky easy and rewarding inside you'll find 50 breathtaking celestial targets to discover easy to follow star maps for every object helping you find your way across the heavens binocular view images so you'll know exactly what to expect as you explore tips and techniques to make the most of your stargazing adventures perfect for every backyard astronomer this guide

turns the night sky into a treasure trove of wonders waiting to be found with 50 things to see with binoculars in space the universe has never been closer or easier to explore

containing its transactions and proceedings and a summary of current researches relating to zoology and botany principally invertebrata and cryptogamia microscopy c

praise for the first edition a serious contender for the title of best all round introduction to binocular astronomy sky and telescope updated with the latest in binocular technology
